

DINESH KUMAR

Software Developer

dineshkumar.veerachinnu@gmail.com | +91 9894921779 | Dindigul, Tamil Nadu | Portfolio | GitHub | LinkedIn

PROFILE SUMMARY

Java backend developer with 4 years building scalable, high-performance Spring Boot applications and RESTful APIs. Specialist in database design, optimization, and zero-downtime migrations across PostgreSQL, MariaDB, MySQL, and MongoDB. Proven track record of measurable impact — improving performance, reducing latency, and automating reporting in Agile, CI/CD-driven teams. Currently expanding into cloud-native and AI-integrated backend development.

TECHNICAL SKILLS

Languages: Java (8, 11, 17)

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security (JWT, RBAC), JPA, Hibernate, MyBatis, JUnit, REST APIs

Databases: PostgreSQL, MariaDB, MySQL, MongoDB, MS SQL Server — design, tuning, and migration

Architecture: REST APIs, multi-module Spring Boot, microservices, modular monolith, approval workflows

Web Technologies: HTML, CSS, JavaScript, Thymeleaf

DevOps & Tools: Git, GitLab, Docker, Maven, Gradle, Nginx, Postman, Swagger, Bruno

Reporting Tools: Jasper Reports

Operating System: Linux

PROFESSIONAL EXPERIENCE

Kshin Tech Private Limited

Jan 2023 – Present

Software Developer | Karur, Tamil Nadu

- Designed and developed scalable Java applications using Spring Boot and Hibernate, improving system performance by 20% through optimized code and database queries.
- Implemented JWT-based authentication and role-based access control for secure API endpoints.
- Developed RESTful APIs with Spring Boot and integrated external services, achieving 85% code coverage through JUnit testing.
- Implemented Thymeleaf for MVC applications and Swagger for API documentation, streamlining frontend-backend integration.
- Managed MariaDB/MySQL databases using JPA, Hibernate, and MyBatis, optimizing query performance by 25%.
- Automated dynamic report generation using Jasper Reports, reducing manual reporting time by 30%.
- Conducted API performance tuning and debugging, reducing system latency by 15%.
- Collaborated in Agile teams using Git/GitLab, maintaining 100% on-time sprint delivery.

PROJECT WORK

AIVS-XROSS — Enterprise Multi-Module Management System

Jun 2026 – Present

Technologies: Java, Spring Boot, Thymeleaf, MyBatis, MariaDB, PostgreSQL, HTML, CSS, JavaScript, JasperReports, Apache POI, GitLab

- Developed and enhanced a large-scale multi-module enterprise application supporting Food (FOD), Water (WTR), Air, and SWS domains using Spring Boot and Thymeleaf.
- Implemented business workflows, master maintenance and popup screens, validation logic, and master-detail relationships with optimized, SQL-injection-safe MyBatis queries.
- Built PDF preview and Excel export using JasperReports and Apache POI, and implemented plan-to-reception data synchronization and role-based processing.
- Migrated legacy Delphi business logic into Spring Boot and collaborated with Japanese clients on requirements, documentation, and GitLab-based releases.

SvenskITS — Hotel Management System

Feb 2026 – May 2026

Technologies: Java, Spring Boot, Spring Cloud, Microservices, MariaDB, MyBatis, REST APIs, GitLab

- Architected a cloud-based Hotel Management System on a microservices architecture with Spring Boot and MariaDB.
- Built core modules — PMS, Room Management, Room Slab Configuration, Hotel Administration — with RBAC for Super Admin, Hotel Admin, and staff, plus subscription and hotel onboarding workflows for multi-tenant operations.

- Integrated AI-powered pricing recommendations and competitor price analysis for dynamic room pricing and revenue optimization.
- Designed secure RESTful APIs for inter-service communication with authentication, authorization, and transaction management across distributed services.

Mahoyuka

Jan 2026 – Feb 2026

Technologies: Java, Spring Boot, PostgreSQL, MyBatis, Thymeleaf, Spring Security, JasperReports, Gradle

- Architected a multi-module Spring Boot enterprise application with 30+ business modules, implementing a MyBatis data access layer with 90+ optimized mapper interfaces for PostgreSQL managing invoicing, procurement, sales, and HR workflows.
- Built advanced reporting system using Apache POI and JasperReports for dynamic Excel/PDF generation, including automated Excel-to-PDF conversion via LibreOffice integration.
- Designed complex multi-stage approval workflows with comprehensive audit trails, transaction management, and automated numbering services ensuring data integrity.
- Optimized application performance with Gradle multi-project builds, JaCoCo coverage reporting, and internationalization support for Japanese language processing.

SSJLTC

Jun 2025 – Dec 2025

Technologies: Java, Spring Boot, MongoDB, Jasper Reports, GitLab

- Engineered a Spring Boot web application with MongoDB backend, migrating from legacy MySQL with zero downtime.
- Developed high-performance REST APIs achieving 300ms average response time through query optimization.
- Implemented document-based data modelling in MongoDB, improving query efficiency by 40%.
- Automated dynamic report generation using Jasper Reports, creating comprehensive student learning assessments with integrated sub-reports, reducing manual reporting time by 65%.
- Introduced MongoDB aggregation pipelines for complex analytics and reporting.

Scientific Language

Aug 2024 – May 2025

Technologies: Java, Spring Boot, MyBatis, MariaDB, Jasper Reports, GitLab

- Designed and developed backend services using Java and Spring Boot, exposing RESTful APIs for seamless data exchange and business logic execution.
- Migrated application database from legacy MS SQL Server to MariaDB, managing full schema conversion and data transfer with no data loss.
- Integrated Jasper Reports for dynamic report generation and data visualization.
- Enhanced API performance by 30% through systematic tuning and SQL query optimization.
- Utilized GitLab for version control, CI/CD automation, and code collaboration.

Emigrate

Aug 2023 – Jul 2024

Technologies: Java, Spring Boot, Hibernate, JPA, MariaDB, Jasper Reports, GitLab

- Developed and optimized RESTful API endpoints using Java, Spring Boot, Hibernate, and JPA.
- Designed dynamic document templates in Jasper Reports that automated 80% of visa processing paperwork.
- Conducted manual testing and debugging to ensure application functionality and stability.
- Managed version control, code merging, and conflict resolution using GitLab.

Astro-Matching

Mar 2023 – Jul 2023

Technologies: Java, Spring Boot, MyBatis, MySQL, Thymeleaf, GitLab

- Developed a Thymeleaf-based astrology web application delivering daily horoscope updates to users.
- Implemented a profile-matching module for compatibility analysis between user profiles.
- Built a real-time chat feature enabling users to consult directly with astrologers.
- Built localized UI with Thymeleaf supporting 2 languages, increasing user engagement by 45%.
- Reduced page load time from 3s to 0.8s through query optimization and caching strategies.
- Automated horoscope report generation using Jasper JRXML templates.

EDUCATION

MSc — Master of Science (Mathematics)

2019 – 2021

Arulmigu Palani Andavar College of Arts & Culture, Palani, Tamil Nadu

BSc — Bachelor of Science (Mathematics)

2015 – 2018

Arulmigu Palani Andavar College of Arts & Culture, Palani, Tamil Nadu
